

Dr. Jason Lowry

ORTHOPEDIC SURGERY, HIP, KNEE & SHOULDER REPLACEMENTS

Dr. Jason Lowry, a fellowship-trained, board-certified orthopedic surgeon, says his orthopedic surgery practice has a small town approach in the big city. "I treat my patients like family," he says. "Getting folks back on their feet and enjoying life again is quite rewarding. I have a really fun job."

He is locally known for his anterior hip replacements and complex, revision hip surgery, but also performs knee and shoulder replacements. He has a special interest in robotic hip replacement; hip and knee replacements for younger, active patients; and complex joint replacements for patients who have suffered from fractures or infections. Anterior hip replacement is performed through an alternative, muscular interval in front of the hip joint that can aid in a much quicker and predictable recovery.

Dr. Lowry honorably served eight years as a commissioned orthopedic surgeon in the U.S. Air Force, including Operation Iraqi/Enduring Freedom in 2009. He joined Arlington Orthopedic Associates in 2015, after initially practicing in Dallas in 2012.

He is co-director of the Joint Institute of North Texas, which was founded as a center of excellence within AOA and aims to provide the most advanced, evidence-based care for patients with joint problems.

Dr. Lowry and his accomplished team are eager to serve you in Arlington, Mansfield or Midlothian.

EDUCATION

Board Certified 2010, American Board of Orthopedic Surgeons. Fellowship, Adult Reconstruction CJPR at RIAO, Sinai Hospital of Baltimore. Residency, Orthopedic Surgery, University of Missouri Kansas City. M.D., Creighton University School of Medicine, Omaha. B.S., AA Theology, Creighton University, Omaha, magna cum laude

Arlington Orthopedic Associates, P.A.

How was the list created?

To create the list, DataJoe Research facilitated a peer voting process during the fourth quarter of 2017. DataJoe and the magazine reached out to both individuals and practices by various means, including postal mail and email, encouraging entities to vote and circulate the online ballot. Each doctor could vote for up to three doctors in each category. DataJoe reviewed and processed each ballot individually, checking for patterns or signs indicative of cheating. After tallying the votes, DataJoe then checked and confirmed that each potential finalist existed in the state medical board license database. If we were not able to find evidence of the doctor's being registered with the state medical board, that doctor was excluded from the list. In addition, any doctor who has been disciplined for an infraction by the state was excluded from the list. Finally, DataJoe presented the tallied result to 360 West magazine for final review and adjustments.

How are nominations obtained?

The magazine and DataJoe Research reach out to both practices and individuals in the region via various methods, encouraging them to vote and distribute the ballot to other doctors. We encourage doctors who want to ensure they are in our system to send an email to surveys@datajoe.com, so that we can conduct a lookup and add their information if needed.

What information is required to make a nomination?

Doctors are required to provide a valid, active license number, and basic contact information identifying themselves. This helps us ensure fairness in the voting process by ensuring that each of the doctors completes only one ballot. The final results are aggregated, so doctors' ballot choices remain confidential.

What happens once nominations are received?

DataJoe reviews each individual ballot to ensure fair nomination, isolating and potentially eliminating invalid ballots, ballots suspected of block voting (i.e. identical voting patterns across multiple ballots), duplicate voting, or other issues. After vetting, DataJoe provides a tallied list of most-frequently nominated doctors to the magazine.

How are the practice areas determined?

Although the categories are very broad, they are intended to reflect relevant practice areas in the region. We recognize that there are many specialty areas but cannot accommodate them all. If there is a strong and consistent request for additional practice areas, they will be considered for possible inclusion in next year's nomination.

Do doctors pay to be on the Top Doctors list?

Doctors can't pay to be on the list. After the list is finalized by DataJoe, it is given to the magazine's advertising department, which invites doctors to buy profiles. These profiles appear elsewhere in the magazine, labeled as paid advertising, in a section titled Doctors Worth Knowing. But whether the doctors advertise has no bearing on the list.

What if I don't see my doctor on the list?

This list is by no means inclusive. If you don't see your doctor on the list, and if he or she is someone you like and trust, you should stick with your doctor.

DataJoe uses best practices and exercises great care in assembling content for this list. DataJoe does not warrant that the data contained within the list are complete or accurate. DataJoe does not assume, and hereby disclaims, any liability to any person for any loss or damage caused by errors or omissions herein whether such errors or omissions result from negligence, accident, or any other cause.
